

## MP100 | AUDIO PROJECT STATEMENT

Title: Late To School

Semester/Year: Spring 2020

Software: Audacity

Description (3-4 sentences giving the person listening to your work insight into your creative and technical process. For example: I decided to do the subway and trains because I use everyday to travel and it's an adventure sometimes with the way the MTA works. I used a total of 9 different sounds with mostly using the envelope and time shift tools. Audacity helped by being easy to use and understand. The most challenging part was trying to put all the sounds together without them sounding totally out of place. Also some sounds I wanted weren't available online so I tried to make up for that space.
